I am a 23 years old Computer Science student, highly interested in Front-End field. Since summer '22 I am teaching myself outside of studies coursework on a daily basis. My current main goal is to gain first professional experience as a Junior Software Engineer and utilize my skillset and broaden my knowledge, so I can become a efficient Developer with a high value to my employer.

EXPERIENCE

06.2019 – CURRENTLY
ROOFER, L.CH ROOFS

EDUCATION

2020-CURRENTLY
BACHELOR OF SCIENCE IN COMPUTER SCIENCE,
WARSAW SCHOOL OF BANKING

I am currently in my 5th semester of Computer Science with Front End specialization studies.
During my coursework there, so far I have learned basics of functional and object-oriented programming as well as basics of computer science field related subjects.
Some of relevant programming languages and frameworks / libraries that I have used are : Java, Python, AngularJS, ReactJS, jQuery.
Earned Chancellor's Scholarship for Best Students.

SKILLS

- Programming in JavaScript ES6+, HTML5 and CSS3
- Discipline and Patience, that allows me to study and learn new things mostly on my own
- Currently familiarizing with VueJS2 and its ecosystem
- Problem solving attitude
- Communication

PERSONAL PROJECTS

Links to all project sites and Github repositories can be found in Portfolio Website as well as in header section of this Curriculum where link to my personal Github account is placed.

During my time studying and practicing Front-End technologies I have built a few applications both with use of a framework, and only in plain JavaScript. These projects took me from few hours up to a few days of evening work to complete, and they represent my current state of skills and knowledge.
